University of Wisconsin  
Madison 6, Wisconsin

Dear Joshua:

I received Davis' comments on your manuscript, and I enclose a copy of them for you, also a manuscript of his that is still in press. As you expected, Berny has written practically as much in comments as you had in the original paper. I have not yet read his comments, but I will do so tonight.

Please let me have your reactions as to what can and what cannot be included or appended, and then I will do the fitting in. Please return his manuscript and the comments, which I shall then return to you if you wish to have them.

With best regards,

*S E Luria*
